

Complete CO control system

Features:

- Plug & Play
- Fully compliant to AS1668.2
- 24 hour volume purge
- Audio and visual alarms
- Remote monitoring and diagnostics
- Records usage and conditions for 12 months
- Commissioning support available

Connectivity:

- Connects to BMS
 - BACnet or Modbus
- Connects to fire panel
- Connects to MSSB
- 31 jet fans per zone
- 3 Supply and 3 exhaust fans per zone
- 31 sensors per zone
- VSD's for supply and exhaust fans

Future proof - additional expansion modules:

- Alarms and relays
- Sensors and detectors
- 0-10V DC signals

Sensors & Detectors:

- CO
- Smoke
- NO₂
- Temperature

Image shows CO level without adequate ventilation i.e. non-compliant.

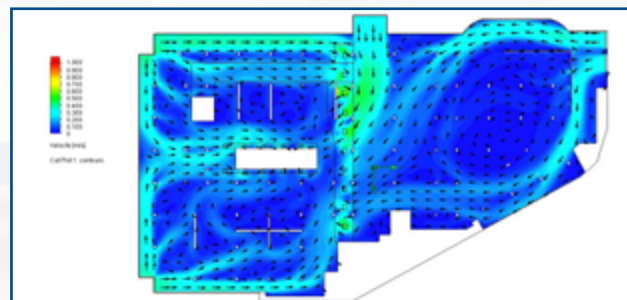

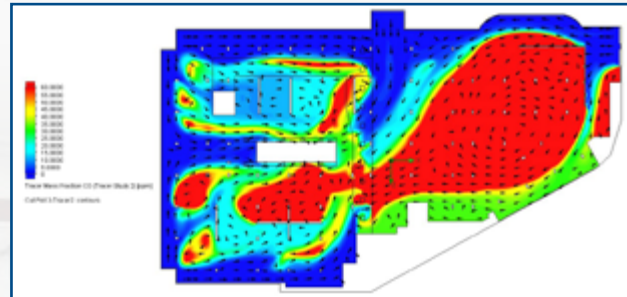

Image now shows acceptable CO level with Pacific Ventilation jet fan design implemented.

Sensor with LCD
*also available without LCD

VSD

HMI touch control screen

- ▶ Jet fans
- ▶ Sensors and smoke detectors
- ▶ Car park controller

- ▶ CFD
- ▶ Variable speed drives
- ▶ Exhaust and supply fans
